APPENDIX A - NETWORK SECURITY POLICY

The Mississippi Coast Coliseum Commission (MCCC) requires that all devices directly or indirectly accessing MCCC's network(s) have the latest virus scan software, operating systems security updates, system patches, and any other technological precautions necessary to protect the Customer(s) and others from viruses, malicious programs, and other disruptive applications. Any device(s) which adversely affects MCCC's network and/or has the potential to cause service interruptions to Customer(s) can, at the sole discretion of MCCC and with or without prior notice, lead to disconnection of the Customer's equipment from the network(s). The device(s) in question will remain disconnected until all issues are adequately resolved. All charges will apply and no refunds will be given. Additional charges may apply for trouble diagnosis and / or problem resolution.

MCCC has implemented filtering policies on all Internet routers. These filters may block inbound and outbound traffic for certain ports. In the event these ports are required, please contact convention staff for availability with specificity of what TCP and UDP ports are requested.

Each Customer's business is important to MCCC and with advanced and timely notification of a Customer's needs, we are confident that we can provide network services that perform as expected for all clients.

- **Please inform all show and site personnel about the importance of MCCC's Network Security compliance issues**
- **Services are activated after the MCCC is in receipt of this signed declaration of compliance with our network security requirements (Appendix A)**

With execution of this document, the Customer hereby attests that Customer provided equipment, which will be connected to MCCC's network, has been properly protected, contains anti-virus software, and has the latest patches and security updates installed. The customer(s) also accepts responsibility for the performance of Customer's equipment and understands the conditions placed on service delivery by this document as well as the potential that additional charges may be incurred should Customer's equipment be found to adversely impact the MCCC network(s) performance. The Customer acknowledges that this Network Security Declaration is part of the Customer Contract allowing Mississippi Coast Coliseum & Convention to provide requested service(s) and is subject to change without notice.

APPENDIX B - FLOOR PLAN

MCCC PROVIDES ALL VOICE AND DATA COMMUNICATIONS CABLING WITHIN BOOTHS

Prior to the show move in day, please submit a floor plan of your booth(s). If you do not have a floor plan, please use the grid below.

X = Main Distribution Location (MDL) – The originating line(s) for service, whether from overhead, a floor pocket or a column, will be delivered to a "MDL" before being distributed within your booth. Example: Storage area, back of booth, etc. (unless specified, the default for the "MDL" will be the back of the booth or at High Pointe's discretion, the most convenient location). All distribution of services to their final destination within the booth will originate from the "MDL". A per line move fee will apply to relocate services within your booth after they have been engineered and / or installed.

T = Location of Telephones, Fax lines or other telecommunications equipment "T".

I / H / PC / C = Location of primary Internet Service "I", Hubs "H", Patch Cables "PC" and / or Computers "C". For MCCC to perform your floor work, you will need to indicate the location of each item you want cabled. Make sure to order your floor work, hubs, and patch cables early and in advance of the show moving in.

Orientation = The Booth or Aisle #'s surrounding your booth. A minimum of one surrounding Booth or Aisle # is required (two or more would be more helpful) for MCCC to accurately install your services.

Size = Booth dimensions (example 10x10)
